Abhimanyu Hans

College Park, MD · ahans1@umd.edu · (929) 832-1886 · https://ahans30.github.io/

Research Interests

My research interests revolve around ensuring the security, efficiency and robustness of generative models. Particularly, I care about memorization and privacy related problems around language models. I'm also keen to smart scale LLMs models where we can maximise performance per flop.

EDUCATION

University of Maryland - College Park

PhD Computer Science (Advised by **Prof. Tom Goldstein**)

Aug 2022 - May 2026 (Expected)

University of Delhi

BS Mathematics (Honours)

2014 - 2017

Publication

• Spotting LLMs With Binoculars: Zero-Shot Detection of LLM Text [ICML 2024] [code] [demo] A. Hans*, A. Schwarzschild*, V. Cherepanova, H. Kazemi, A. Saha, M. Goldblum, J. Geiping, T. Goldstein

• Goldfish Loss: Mitigating Memorization in Generative LLMs

[NeurIPS 2024] [code]

A. Hans, Y. Wen, J. Kirchenbauer, H. Kazemi, P. Singhania, S. Singh, G. Somepalli, J. Geiping, A. Bhatele, T. Goldstein

• Democratizing AI: Open-source Scalable LLM Training on GPU-based Supercomputers S. Singh, P. Singhania, A. Ranjan, J. Kirchenbauer, J. Geiping, Y. Wen, N. Jain, A. Hans, M. Shu, A. Tomar, T. Goldstein, A. Bhatele

Awards

• Invention of the Year 2024

[Maryland Innovate, 2024]

Relevant Work Experience

University of Maryland Institute for Advanced Computer Studies Graduate Research Assistant

College Park, MD May 2023 - Present

• Working on language models from security and alignment perspective.

PayPal Machine Learning Engineer

Remote Work (India) Oct 2021 - Aug 2022

- Automated model monitoring framework, saving 70+ FTE weeks, and deploying interactive dashboards for multiple model-specific teams (spanning 100+ model use cases)
- Employed quantitative metrics (AUC, Accuracy, KS-statistic, population stability index) and qualitative analysis (LIME) to enhance model performance and feature interpretability.

HDFC Bank Mumbai, India Jan 2020 - Oct 2021

Machine Learning Engineer

- Created an anomalous transaction detection system using AutoEncoder and Isolation Forest algorithms, enhancing fraud detection capabilities to achieve 25% recall at 0.1% FPR
- Developed a user-friendly model repository CRUD application using Flask, Jinja Templates, and PostgreSQL, streamlining internal model management processes.

Think360.ai Mumbai, India Oct 2018 - Jan 2020

Associate Data Scientist

- Developed a deep tree models for predicting repossession values of construction equipment.
- Developed an automated business intelligence pipeline using Tableau, R, and Bash, serving over 5000 FTE with dashboards and email reports.

SKILLS

- Languages & Tools: Python, Java, JavaScript, SQL, Git, Docker, Linux, AWS, Shell
- Frameworks: PyTorch, HuggingFace suite, Flask, React, Tableau, Pandas, NumPy, Sklearn, SpringMVC

Method for Detecting Text Generated by Large Language Models.

PROJECTS (MACHINE LEARNING & SOFTWARE ENGINEERING)

Multi-Armed Bandit Algorithms

(code)

A NumPy-based implementation of Greedy, Epsilon-Greedy, and Upper Confidence Bound algorithms along with their empirical performance analysis.

Active Learning (code) (slides)

An approach to ML wherein the learner queries the user with best instance for a label.

Model Repository

(code)

Full-stack Flask app serving as a repository for models and their performance metadata.
